

**Regulations for Events classified as DIY
(to be read in conjunction with Regulations for all events
and Regulations for BP or BR events as appropriate)**

1	DIY are events for individuals where riders define their own ride date and control details.
1.1	DIY events are additionally classified as either BR or BP and adopt the speed & distance limitation of those categories, except that minimum speed up to 600km will be 14.3 km/h.
1.2	Controls must be submitted to and agreed by the organiser in advance of the ride
1.3	Routing between controls may be 'advisory' (left to the rider's choice on the ride), or 'mandatory' (route submitted in advance to organiser and which rider must then follow). Mandatory routing is validated exclusively by means of a recorded GPS tracklog. GPS track logs may also be used on advisory routes as alternative to conventional paper Proofs-of-passage
1.4	Rides may be of any distance but can only be registered and validated at the standard distances: In increments of 50 km up to 200 km and in increments of 100km thereafter.
1.5	Ride distance for advisory routes is taken to be the aggregate shortest rideable distance between the nominated controls.
1.6	For rides by AUK members validated as BR, AUK distance points are awarded at a rate of 1 point for each 100 km of distance.
1.7	Where validation is by means of GPS track, the rider may request submission of the event for assessment of AAA points which, if awarded, are added to the member's record of the ride.
